

“Green Sunday” – A Meaningful Activity Towards a Green, Clean, and Beautiful Environment

In parallel with activities celebrating Youth Month, on the morning of March 24, 2024, the Youth Union of the Faculty of Electrical and Electronics Engineering launched a “Green Sunday” campaign at 31 Che Lan Vien.

Students actively participated in collecting plastic waste, foam boxes, and general litter, as well as cleaning and maintaining the practice workshop area. The activity attracted a large number of students, demonstrating a strong spirit of solidarity, cooperation, and collective responsibility.

As a result, the campus environment was significantly improved, with plastic waste removed from green areas, schoolyards cleaned, and workshop spaces restored to a tidy and organized condition.
